

# FAMILY/PARENTING

Research has found links between family environment and criminal lifestyle. Arrests in family members constitute a major risk factor for poor developmental outcomes, including criminal behavior.

## MEASURE OF NEED

Family Assessment Device [FAD-12; Epstein, N. B., Baldwin, L. M., Bishop, D. S. (1983)]

- Based on the McMaster Model of Family Functioning (MMFF), the FAD-12 is a brief, stand-alone measure of family functioning with solid psychometric properties. The FAD-12 has been widely used in both research and clinical practice. Higher scores indicate greater levels of family dysfunction.
